## Last Cut Wood For The Elders Day

The Tribal Natural Resources Committee and Natural Resources Department will sponsor the last "Cut Wood For The Elders Day" of the year on **Saturday, September 17<sup>th</sup>**. The woodcut will be held on the **Tribe's Logsden Road Property to the right of the Tribal Food Distribution Warehouse** in Siletz. We need lots of volunteers to help cut, split and deliver firewood, for Tribal elders. Bring your chainsaws, hydraulic wood splitters, splitting mauls, axes, and lots of energy. Even if you don't have any of those we can use the moral support! Lunch, drinks, and snacks will be provided. We will start at **8:00 AM** and go until around 2:00 PM.

The goal of this event will be to deliver firewood to as many elders as possible. The Elders' Program maintains a list of elders that burn wood for their winter heat. People willing to haul firewood to elders outside of the Siletz area, please contact the Elders Program Clerk at 1(800) 922-1399 ext. 1261 or (541) 444-8261 to be paired up with an elder in need. We especially need folks who can haul wood to the Eugene, Salem, and Portland areas. Elders in need of firewood should also contact the Elders Program Clerk to get their name on the delivery list.

**If you have parents or grandparents that burn wood in the winter to stay warm, you need to help out at this event!**

# Behavioral Health Program

## Providing Telemedicine:

Mental Health Specialist Rachel, has been providing telemedicine to tribal members and their families since March of 2020. It was recently decided that these services will continue to be provided 3 days per week for the foreseeable future. Though Rachel has not started seeing clients in person, once the area offices are open, she will be in **Salem on Wednesdays**, and **Portland on Fridays**.

## What does Telemedicine look like?

Mental Health Specialist Rachel provides Telemedicine from her home, in a confidential room in the house, where the only occasional interruption is a cat jumping into her lap.

1) There are two programs currently being used by MHS Rachel to provide confidential, encrypted Telemedicine. One program is

doxy.me, and the other is Zoom. Each of these services provides a way for people to connect using a computer or smart phone, and gives face-to-face interactions via video.

2) Mental Health Specialist Rachel is also able to provide telephone appointments, when clients do not have access to, or prefer not to use, the technology required to run video programs.

## Why can't services be provided by other means, like FaceTime?

1) While FaceTime and Messenger video calls are convenient, and perhaps more readily accessed than the applications used in Telemedicine, they are not currently encrypted which means they do not protect confidential information.

2) If a new Telemedicine option becomes available that is encrypted, Mental Health Specialist Rachel will be happy to have administration investigate the potential of using said option.

## Back To School!

For many of our children, the beginning of the school year, is a big step. It involves meeting new teachers, going to a new classroom, seeing old friends and meeting new ones. Some children might have worries about the demands of a new school year. If you would like information about how to ease any anxiety over returning to school check this web page out, or google others: <https://www.pbs.org/parents/thrive/back-to-school-tips-for-parents>

Most importantly, meet your child's teacher. Let them know you value your child's educational experience. Check to see if their school has an Indian Education Program with the school district. Also, make sure your child will get lots of sleep.

If you are in need of assistance, resources, advocacy or referrals please email or call me.

My best wishes to all our families in this new school year,

Katy Holland

## Vocational Rehabilitation Program

### September: What is Dyspraxia?

Dyspraxia, a developmental coordination disorder (DCD) is a condition that affects the brain's ability to plan and process motor tasks. It causes disturbances in movements, planning, speech and learning new tasks, and processing new information. Dyspraxia may adversely affect one's fine and gross motor skills, handwriting, low muscle tone, articulation, learning new information, mental health, and more. Individuals with Dyspraxia often have language problems, and sometimes difficulty with thoughts and perception. Dyspraxia, however, does not affect the individual's intelligence. It can sometimes cause learning problems.

Experts say that 10 percent of people have some degree of dyspraxia, while approximately 2 percent have it severely. Four out of every 5 children with dyspraxia are boys, although there is some debate whether there are under-diagnosed girls. Children with dyspraxia may also have Attention Deficit Disorder-Hyperactivity (ADHD).

Dyspraxia/DCD is distinct from other motor disorders such as cerebral palsy and stroke. Individuals may experience changes depending on environmental demands and life experiences. Dyspraxia persists into adulthood.

#### Symptoms:

- Poor balance
- Poor posture
- Fatigue

- Clumsiness
- Differences in speech
- Perception problems
- Poor hand-eye coordination
- Social and sensory issues: individuals with Dyspraxia may be extremely sensitive to taste, light, touch, and/or noise. There may be a lack of awareness of potential dangers. Many experience mood swings and display erratic behavior.

**Accommodations:** use of a white board, checklists, electronic organizers with recorded directives, messages, or a task flow chart.
